

## Sealed Specialist Waste Container [SSWC]

### Services to the Wastewater Industry

As a company we are often contacted for design and manufacture of bespoke versions of our products, the story behind the SSWC is no different...

The original client brief was for equipment to facilitate the transportation of animal waste from the fish farming, slaughter and tannery industries. A sealed roll on-off system was required that could be easily loaded and unloaded whilst preventing any odour or spillage.

Taking the original brief and fulfilling the client's original requirements we have moved the design forward with foresight and distinctive design features with the simple aim of improving the process. The original client being so impressed with the new scratch-built design they have quickly adopted the new design.

The Mk2 SSWC is proving a popular design, with several customers already seeing the design benefits for both business and operator convenience, safety and productivity.

*"The savings made enable investment in additional equipment, whilst still reducing cost to customers, the savings in labour alone are proving lucrative and operatives are much happier working with the new system"*

# Caring for the environment, by design...

**Features:**

- 21.5 m<sup>3</sup> capacity
- 1.4 m<sup>2</sup> sealed sliding or split loading hatch with air tight seals
- Hydraulically operated rear door
- 4" rear lockable drain point
- foldaway ladders for top access
- safety harness fixing points
- 6" interceptor inlet & outlets for use on other projects
- ferry lashing points
- built onto a hook lift chassis
- corrosion resistant internal lining

## Technical Specifications

|                                   |  |
|-----------------------------------|--|
| <b>Length:</b> mm                 | <b>6552</b>  |
| <b>Width:</b> mm                  | <b>2450</b>  |
| <b>Height:</b> mm                 | <b>2650</b>  |
| <b>Weight:</b> KG ( <i>Tare</i> ) | <b>2750 (APPROX)</b>                                   |
| <b>Capacity:</b> M <sup>3</sup>   | <b>21.5</b>  |
| <b>Connections:</b>               | <b>2 x 6" interceptor valve<br/>1 x 4" drain valve</b> |
